💼 PROFESSIONAL EXPERIENCE

eGeneration Ltd.
Trainee Software Engineer
03/2022 – 12/2022

- Completed Training on ASP.net Core MVC, Web API and Entity Framework with 75% marks following Layered Architecture Pattern.
- Involved in creation of in-house Human Resource Management System where I contributed about 15% of the total work done in React.js.
- Generated multiple complex forms for Admin Module with frontend technology like Angular.

Raven Systems Ltd.
Junior Software Engineer
03/2023 – 07/2023

- Involved in creation of an ASP .Net Core MVC application for Directorate of Inspection of Factories and Establishment (DIFE) following Layer Architecture where I contributed about 50% of the backend application.
- Contributed to the in-house ERP system by including a small module for Support Ticket System.

TechnoNext Ltd.
Junior Software Engineer
07/2023 – present

- Utilized advanced accounting software, ShopLover Accounting, to manage financial transactions and generate comprehensive reports in the accounting project.
- Played a key role in tracking and managing land assets, including land asset purchase and sales in the US Bangla Real Estate business project.
- Worked with different DBMS like MS SQL server and PostgreSQL, and also worked with popular ORM Dapper to improve performance of overall application.
